

PowerUp Products from B/A!

Part# 23-S9FM3ME This Heavy Duty floor mounted switch panel features 9 magnetic circuit breaker switches, 3 in cab under lift control switches, provision for PTO switch and LED backlit legends.

Part# 23-100935 The Power Touch Basic 6 is an intelligent 6 button touch pad that is connected to a multi-functional intelligent Input/output module that can be used in place of traditional switch panels and circuit breaker control systems. The Power Touch Basic system compact size fits virtually any vehicle and with its high power outputs can handle the most demanding electrical loads.

Part# 23-120100 These Tail Board mounted underlift controls feature a 4 switch, 8 function remote with 15' of cable. Unit can be wired directly to valve bank or junction box. Rated for 12 and 24 Volt.

Part# 23-502000 This is a multi-use part.

Use #1. Foreign to domestic 3-2 tail light converter.

Use #2. Upfitters 1 to 1 distribution center for truck chassis with low amperage factory switches that are required to operate components that require more amperage than the factory system can provide.

Part# 23-1202008 Used to add outside controls on any wreckers with electric over hydraulic valve bank. Units work on 12 or 24 volt valve banks. Each switch panel is dual labeled on the front face and on the protective cover. Units are sold individually.
